University of Colorado at Boulder
1996 Graduate Student Symposium
**Department of Molecular, Cellular, and Developmental Biology**

Porter Biosciences Building
Campus Box 347
Boulder, Colorado 80309-0347

March 1, 1996

Dear Symposium Sponsor:

On behalf of the graduate students of the Department of Molecular, Cellular, and Developmental Biology at the University of Colorado, Boulder, we would like to extend an invitation to the members of your organization to attend the 1996 Graduate Student Symposium entitled "**Pattern and Polarity: Establishing Difference in Development.**" It will be held from Friday, April 12 to Sunday, April 14 and all are welcome to attend.

This symposium will consist of a keynote address and three sessions: I) Cell Polarity; II) Polarity in Early Embryogenesis; and III) Refinements on Polarity—Decisions in Late Development. In addition to the scientific sessions, we have scheduled additional activities including catered meals, a reception on Friday evening, an outing on Saturday afternoon, and a Saturday night party.

This is the sixteenth symposium organized by the graduate students of the Department of MCD Biology. Past symposia have been increasingly successful at bringing together leading scientists for an intensive and enjoyable weekend in Boulder. We are confident that this year's conference will follow in that tradition.

Please post the enclosed schedule of events and retain the registration forms for anyone who might be interested. (If we directed this material to the wrong office, we request that you kindly forward the information to the appropriate individual.) Thank you very much for your help and donation. Your generosity enabled this event to occur, and we look forward to meeting members of your organization.

Sincerely,

Dominique Bergmann, Heather Flanagan, Brian Lu, and Stephanie Mohr
